

Overview

Our Environment team is proficient and experienced in all sorts of environmental matters, including soil and groundwater contamination, pollution control, environmental licensing, forest protection, indigenous territories, waste management, water resources, climate change, among others. The team's services include:

- Regulatory compliance;
- Risk assessment regarding environmental liabilities;
- Clients representation in civil or criminal investigations;
- Litigating in class actions, indemnification claims, administrative proceedings, as well as challenging regulations and/or decisions of authorities;
- Conducting alternative dispute resolutions and negotiating settlements;
- Legal advice for management of contaminated sites;
- Legal due diligences for acquisition of equity or assets, joint ventures, financial market transactions, infrastructure projects, etc.;
- Legal structure and guidance for environmental licensing and related permitting;
- Client representation in negotiations with regulators and other authorities, as well as private parties;
- Legal advice in regulatory matters, such as controlled chemicals, biotechnology, food and agribusiness regulations, products safety and labelling, metrology and class council regulations.
